Business Optimism Index

The Asian Country Optimism Index declined slightly while the Own-Firm Index remained relatively stable relative to the previous quarter.

Notes: Presented data are the mean value for each region or country. Scale from 0-100
CFOs in Asia, the United States and Latin America expect a decrease in earnings growth, driven by declines in expectations for Japan and Singapore.

Earnings expectations have generally decreased in most regions
- CFOs in Asia, the United States and Latin America continue to report declines in expected earnings growth, while Europe expects an uptick in earnings growth.

The decrease in earnings expectations for Asia is driven by the low expectations reported by CFOs for Japan (-0.7%) and Singapore (1.9%)

Notes: Presented data are the mean or median values for each region or country.
The inflation outlook for Asia, Latin America and Europe has fallen from the previous quarter, in contrast to a small increase observed for United States and Africa.

Inflation expectations have declined for Asia, Latin America and Europe:
- Europe saw a sharp decline in inflation expectations to below 2%, while inflation expectations for Africa increased to a 5.8% increase in prices over the next year.

Price expectations are flat for the products produced by Asian companies over the next year:
- Inflation expectations in Japan are at -0.34% while those for other Asian countries are at 0%.

Notes: Presented data are the mean or median values for each region or country.
The revenue growth outlook for all economies declined since the last quarter; Europe and Africa expect declines of more than 5%.

Europe and Africa expect declines of 6.1% and 5.5% respectively, while Latin America’s outlook declined by 3.5%.

- Except Africa, the revenue growth outlook for all economies is at its lowest in the past year.

Japan’s revenue outlook has increased from -1.9% last quarter to 0.8% in the current quarter.
- Asia’s CFOs’ revenue growth outlook decreased to 1.1%, partially in reflection of low Asian inflation.

Notes: Presented data are the mean or median values for each region or country.
Capital Spending Plans

Capital spending plans among Asian CFOs have decreased significantly, falling from last quarter.

Capital spending plans are flat or negative around the world
- Capital spending plans have either softened or declined in all regions
- Europe’s and Latin America’s capital spending plans have remained positive, though slower compared to the previous quarter

Notes: Presented data are the mean or median values for each region or country.

Capital spending plans soften for most major Asian economies
- The overall outlook for Asia is lower than expectations of CFOs of other regions, such as Europe, Latin America, US
- In Asia, Japan’s positive capital spending outlook is offset by the outlook of two other Asia’s major economies, China and India, which both are anticipating capital spending to fall by 2%
For the first time in the last six quarters, Asia has a negative employment outlook, while the outlooks for other regions remain weak but positive.

**Global Trends**

Employment growth expected to be below 2% for all regions
- The U.S. outlook remained stable at the 2% range, but is still lower than several quarters ago
- Asia expects a 1% decline in employment over the next year, while the European and Africa outlooks have improved

**September 2019 Outlook**

The Asian employment outlook has overall decreased despite an improvement in Japan’s employment outlook.

*Notes: Presented data are the mean value for each region or country | #FT=Number of Fulltime Employees*
Apart from the flat US outlook, wage growth expectations have declined around the world. Asian CFOs expect low wage and salary growth.

### Global Trends

Wage growth outlook mostly consistent across regions
- Asian, European, Latin American, and African regions are expecting slower wage growth.
- Wage growth continues to be the highest among African CFOs, reflecting in part higher price inflation.
- Employment in the US is expected to remain stable at about 3%, while Asian employment growth is expected to be only 1%.

### September 2019 Outlook

Asian CFOs have less optimistic wage expectations
- CFOs in China have lower wage expectations than the overall Asian region.
- Meanwhile, CFOs in Japan have increased their wage expectations of roughly 3% growth, boosting the outlook of the Asian region.

Notes: Presented data are the mean or median values for each region or country.
When Will a Recession Occur?

*For your country: In which quarter do you expect a downturn (recession) will occur?* A majority of CFOs in all regions expect a recession to start within one year.
