Asian Business Outlook

Part of the Global Business Outlook

A joint survey effort between

Duke University and CFO Magazine
The Asian Country Optimism Index and the Own-Firm Index are at the lowest in the last decade.

**Notes:** Presented data are the mean value for each region or country. Scale from 0-100.
The revenue growth outlook for United States, Europe and Latin America declined since the last quarter; in contrast Asia’s and Africa’s growth outlook increased modestly.

United States and Europe expect moderate declines, respectively, while Asia’s outlook increased but is still low

- For United States and Europe, the revenue growth outlook is at its lowest in the history of the survey.

Latam is the most optimistic on revenue outlook at 7%, followed by Africa at 4%

- Asia’s CFOs’ revenue growth outlook increased by 3.3% to 2%, from a low of -1.3% in the last quarter.

Notes: Presented data are the mean or median values for each region or country.
Capital spending plans among Asian CFOs have increased, demonstrating a boost from the previous quarter.

**Global Trends**

Capital spending plans in Asia turned positive, though are still low by historic standards:
- Both Asia and LatAm expect capital spending to increase about 4%
- Asia’s spending represents a rebound from the previous quarter, while Latin America’s plan has stabilized

**March 2020 Outlook**

The capital spending outlook for Asia is higher than the expectations of other regions:
- Asia’s positive capital spending outlook is driven by the outlook of one of Asia’s major economies, Japan, which is anticipating capital spending to increase 4.8%

Notes: Presented data are the mean or median values for each region or country.
The employment outlook for the US turned negative while outlooks for all other regions remain positive.

**Global Trends**

Employment growth is expected to be above 2% for all regions except the US:
- The U.S. outlook weakened, where employment is expected to shrink over the next year.
- Asia expects a 5% increase in employment over the next year, showing a rebound from last quarter's weak employment.

**Notes:** Presented data are the mean value for each region or country | #FT=Number of Fulltime Employees

**March 2020 Outlook**

The Asian employment outlook has overall increased despite a decline in India's employment outlook.
Wage growth expectations in Asia and Europe have moderately increased with Asian CFOs expecting the highest growth.

**Global Trends**

Wage growth outlook mostly consistent across regions, except for Africa and the US
- Asian and European regions are expecting faster wage growth than the previous quarter, growing at 4.5% and 1.9%, respectively.
- Despite positive expectations, wage growth in Africa and in the US is expected to soften over the next year.

**March 2020 Outlook**

Asian CFOs have moderately optimistic wage expectations
- CFOs in Japan have similar wage expectations with the overall Asian region, at about 4%.

Notes: Presented data are the mean or median values for each region or country.
